Challenges/Opportunities

- Multiple locations
- Dispersed workforce
- No dedicated IT department

Objectives

- Host SAP B1 in the cloud
- Meet deadlines
- Educate staff
- Understand benefits

MyCloud Services

- Project management
- Cloud solution
- Technical partners

Highlights

- Rapid deployment
- Enhanced performance
- Customer education

Why MyCloud-IIS

- Speed
- Cost
- Expertise

Benefits

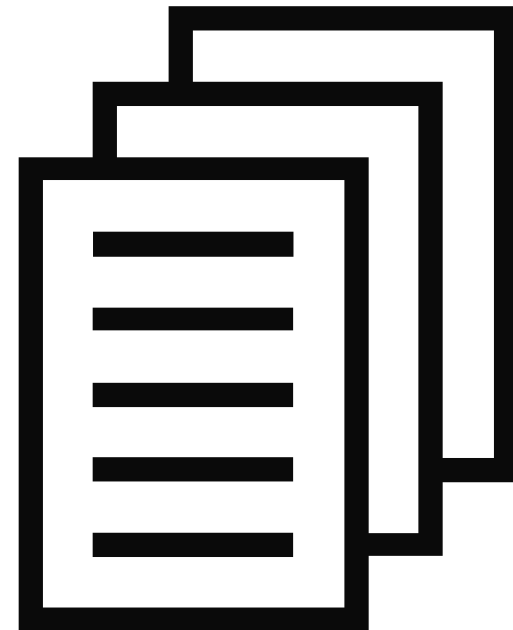

- TCO
- Rapid Deployment
- Flexible \ Scalable

Overview

IIS provide business management software, services and support to small and medium-sized enterprises. The company specialise in supporting and developing SAP Business One - the market-leading ERP solution with over 34,000 customers worldwide.

Combining industry expertise and award-winning customer service, IIS have helped over 350 companies 'Be a Better Business'.

As their trusted IT advisor, **MyCloud** were engaged to discuss the option of hosting the entire IIS IT infrastructure in the cloud. This covered everything from Email, file and print, SAP B1...

*"We believe we can grow the business by another 25 per cent with our existing staff capacity – and with a cloud hosting solution **MyCloud** will be a big part of that"*

MORGAN BROWNE MD IIS

Decision

IIS identified **MyCloud** as the leading provider of cloud solutions in Ireland

Once informed of their in depth experience, expertise and dedication to hosting not only SAP Business One and also their SAP Gold Partner Status they invited them in to discuss the solution they could provide. They decided to go ahead with the implementation having gained the information, insight and reassurance from **MyCloud** that it would be a smooth and greatly supported process.

*'The **MyCloud** infrastructure and offering seemed to tick all the boxes and when we invited **MyCloud** to talk to us, we found that their people had an in depth knowledge of hosting SAP Business One along with everything else. They also had the creativity to expand the system when required.'*

Morgan Browne MD IIS

Rollout

After 3 days of careful scoping and another 5 of Implementation, working with all of the IIS consultants the final data transfer from the old to the new system was completed over a weekend. Staff returned in to work with a new desktop icon which they clicked to access all their relevant applications seamlessly, as if a server were physically on the premises.

If you would like more information on **MyCloud** and the services they provide, please contact us via info@mycloud.ie or on +353 1 9017878
